join us to determine the next steps in the
struggle against sb590 and hb1402

because sb590 is designed to legalize racial profiling. because this proposed law isn't just an attack on communities of color, but a way to massively expand police powers. because unemployment isn't caused by immigration, and this bill's aim is to blame an entire population for the economic crisis. because too many people stay silent about hb1402, which is equally racist, targeting students of color and increasing state interference in higher education.
